

Statement at the LMDC Public Info Session on 130 Liberty Street  
Demolition, Jan. 24, 2005

I would like to raise three issues:

- 1) the need for Gilbane to coordinate and be responsible for health and safety on the site rather than leaving it up to the individual subcontractors.
- 2) The need for centralized reporting of occupational injuries and illnesses rather than leaving it up to subcontractors to collect their own data .
- 3) the need to have OSHAs HAZWOPER standard apply to the deconstruction
